Executive summary

EGEC has firstly developed a webpage, also presents on websites of the project partners. EGEC has then developed a website for the Support Unit of the Deep Geothermal Implementation Working Group.

To ensure the adequate execution of the IP, the Support Unit produces this website. The website is created for the dissemination and exploitation of project results, publications, events, general information about the project.

The website aims to increase the visibility of the Implementation Working Group's works and provide information about project activities and outcomes. The domain name has been purchased for two years, and is registered at: www.deepgeothermal-iwg.eu . The website has been put online in M13.

1. Introduction

This Deliverable provides all the information related to the SU-DW-IWG project website for the IWG-DG. As it is written in the Grant Agreement, **an official website of the project has to be created. Each partner of the project has to create a page in their own website with the main information about the project.** Finally, a link has to be established with the SETIS website to have project outputs presented there.

The present document is intended essentially for the project partners. However, the dissemination level of the document being public, this draft deliverable was open for involved stakeholders who could provide their free comments and suggestions.

EGEC has already published a webpage in the EGEN website, and it is shown in Geothermica, EERA and the partners of the project which are ongoing with this task.

The new official website is now online.

This deliverable will inform about what has been included in the official website and the webpage in partner's websites.

2. Objectives

The main objectives of the website:

- Give a general description of both the IWG and the SU-DG-IWG project;
- Inform about the news or publications of IWG and the SU-DG-IWG project;
- Inform about events related to IWG and the SU-DG-IWG project;
- Inform about the partners of the SU-DG-IWG project and members of the DG-IWG.

3. Key target groups

The target groups identified by the “STRATEGIC ENERGY TECHNOLOGY PLAN - AGENDA 2018-2023” are presented below.

For the dissemination activities of the IWG and SU-DG-IWG, these actors are considered the primary target groups:

- President of the European Commission, Vice President for the Energy Union, Vice President for Growth and Competitiveness, Commissioner for Research and Innovation, Commissioner for Energy and Climate action;
- EU Commission services;
- European Parliament (ITRE Committee);
- SET Plan countries (Ministries in charge of energy, research, competitiveness and industrial policy);
- SET Plan countries (agencies), members and potential members of the DG-IWG;
- Industrial Sectoral associations, their members and other market actors;
- Financial Institutions (EIB, national investment banks, etc) and Industrial Sectoral associations;
- Research community;
- International organizations (IEA, IRENA, OCSE);
- Sectoral and institutional stakeholders;

4. Organisation and collaboration

The lead partner for communication is EGEC, it has the role of developing this website and the maintenance of it. The partners of the project are in charge of giving feedback and suggestions to improve it.

All the partners including EGEC as leader on communication, should add in their own website a page dedicated to the project, keeping it updated regularly.

5. Website

A website of the SU-DG-IWG and IWG has been developed in month 13, but until that month an informative webpage was published on EGEC’s website on month 8.

EGEC will update the website regularly with relevant content, reports, news and events, and it will serve as a reference for the work of the Implementation Working Group.

5.1 SECTIONS ON THE WEBSITE

5.1.1 Home page

This section describes what the IWG is as well as the SU-DG-IWG and the relation between them. This first section includes as well relevant documents as the *SET Plan - Declaration of intent on Strategic Targets in the context of an Initiative for Global Leadership in Deep Geothermal Energy* and the *8 key R&I actions of the Implementation Plan*.

5.1.2 Publications

In this section there are a division of publications, between the SET Plan publications and the SU-DG-IWG project Deliverables. It will be updated every time that a deliverable has been submitted or a new publication from the SET Plan published.

5.1.3 Events

This section is used to promote all the project events or related as well as SET Plan events. It will be updated constantly with the upcoming events.

5.1.4 DG-IWG Members

This section includes all the Deep Geothermal Implementation Working Group members, dividing them by:

- Cabinet
- Member States
- Stakeholders

5.1.5 Support Unit project partners

This section includes the partners of the project, with their respective logos and links to their websites.

5.1.6 Contact

A specific e-mail address has been created for this website: info@deepgeothermal-iwg.eu. It will appear in all the pages of the website. This section might be improved in the upcoming months, in order to create a specific section just for contact.

5.2 HOSTING & DOMAIN

5.2.1 Hosting

The hosting server chosen is WIX, as it offers good possibilities in terms of design and easy to update. The subscription period is for two years (until Feb 4, 2022). It will be prolonged for at least 2 years after the project ends.

5.2.2 Domain

The domain was bought in GoDaddy for two years (until Feb 18, 2022), it will be renewed automatically. It is: www.deepgeothermal-iwg.eu.

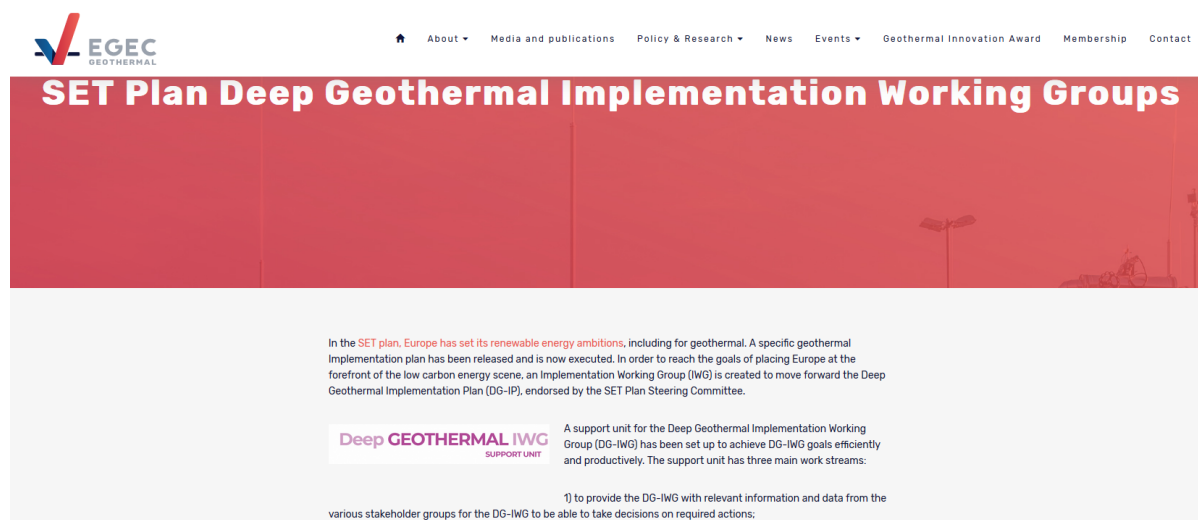

The domain name will be renewed for at least 2 years after the project ends.

6. Informative page in Partners website

Project's partners should include a reference page of the IWG and the SU-DP-IWG in their own websites.

EGEC

EGEC has developed firstly a project webpage that includes the main information on the Support Unit. It can be found here: <https://www.egec.org/set-plan-h2020/>

Screenshot of the page about DG-IWG and the SU-DG-IWG project on EGEC website.

The rest of the partners of the project have included a dedicated webpage in their website. From now, project partners will refer to the new official website with relevant contents, deliverables and events linked to the project.
